

SAP Penetration Testing

case study

How Vicxer Enhanced Cybersecurity for a Tech Giant

"Our client is a **leading technology corporation**, globally recognized for their innovative consumer electronics, computer software, and online services. With a **dominant presence in the hardware market**, their smartphone division alone **captures 51% of the global cellphone market**, setting industry standards.

Objectives

As the company's SAP systems grew more complex, so did their cybersecurity risks. The aim was clear: **ensure the integrity and security of critical systems** while **avoiding any disruption to business** operations.

Solutions

Through **expert vulnerability assessments** and innovative methods, Vicxer **identified and remediated** critical vulnerabilities, **fortifying the company's infrastructure** against potential cyber threats.
